LMU LUDWIG-MAXIMILIANS-UNIVERSITÄT MÜNCHEN

FACULTY OF VETERINARY MEDICINE
CENTRE FOR CLINICAL VETERINARY MEDICINE
CLINIC OF SMALL ANIMAL MEDICINE

Ludwig-Maximilians-Universität München (LMU) is one of the largest and most renowned universities in Germany. The Small Animal Clinic of LMU Munich has vacancies for the position of:

Veterinarian (m/f/d) undertaking a Standard-Track Residency in Veterinary Anaesthesia and Analgesia (ECVAA)

Start date: 01.02.2027
Application deadline: 01.12.2026
Contract type: Full-time (100%)
Contract duration: 4 years

Your profile:

- Degree in veterinary medicine (required)
- German licence to practise veterinary medicine (Approbation) or eligibility for a temporary licence to practise (vorübergehende Berufserlaubnis) (required)
- Good written and spoken German for communicating with owners, students and colleagues (CEFR B2 level). Candidates who do not yet have this level of German should be willing to acquire it promptly (required).
- Completed rotating internship or at least 2 years of relevant clinical veterinary experience in line with ECVAA requirements (required)
- Practical experience in anaesthesia and pain management is an advantage
- Strong interest in anaesthesia and analgesia and the motivation to keep developing professionally and personally
- Interest in investigating clinical questions scientifically and in contributing to teaching
- Sound clinical judgement, a structured approach to work and the willingness to take responsibility, including in critical situations
- Enjoyment of teamwork and clear, respectful communication with owners, students and colleagues

We offer:

- A 4-year specialist training programme in veterinary anaesthesia and analgesia in accordance with the requirements of the European College of Veterinary Anaesthesia and Analgesia (ECVAA)
- A full-time (100%) salaried position with emergency shifts as well as on-call duties (remunerated separately)
- A structured training programme with weekly resident seminars and journal club, plus a continuing education allowance
- Work in a large, dedicated and varied team of specialists (including Anaesthesia, Cardiology, Clinical Pathology, Dermatology, Diagnostic Imaging, Emergency & Critical Care, Internal Medicine, Neurology, Oncology, Reproduction, Sport & Rehabilitation Medicine, & Surgery), at an excellently equipped university hospital
- LMU employee benefits, such as a subsidised public transport ticket and discounted fitness and cultural offers

Residency at the Small Animal Clinic:

The Small Animal Clinic of LMU is a modern university veterinary hospital specialising in cats and dogs. As a resident, you will provide anaesthetic care for patients from all services of the hospital, from elective procedures and diagnostic investigations to emergencies and high-risk patients. You will deepen your knowledge of anaesthetic management, monitoring, mechanical ventilation, locoregional anaesthesia and perioperative pain management, and further develop your skills in a clinically demanding environment.

The Small Animal Clinic of LMU offers an environment of high scientific and clinical standards, with Diplomates in surgery, diagnostic imaging, sports medicine and rehabilitation, internal medicine, neurology, cardiology, dermatology, emergency and critical care, and anaesthesia and analgesia. A 24-hour staffed intensive care unit is available for critically ill patients.
As a university hospital, we also give you the opportunity to combine clinical experience with research and the teaching of students.

The undertaking of this residency will prepare you for the Diplomate examination of the European College of Veterinary Anaesthesia and Analgesia (ECVAA).

Your workplace is centrally located right next to the English Garden in Munich and is easily reached by public transport. With the river Isar, the nearby Alps and many beautiful lakes, Munich offers a very high quality of life with plenty of opportunities for hiking, climbing, skiing, sailing and cycling.

LMU is an equal opportunity employer and welcomes applications from all people, regardless of gender, origin, age, religion, disability or sexual identity. LMU aims to increase the proportion of women in research and teaching and strongly encourages women to apply. Applicants with severe disabilities will be given preference if equally qualified.
