Research fields

The LMU Munich School of Management focuses on strategic research fields. These are assigned to five clusters in order to promote competitive and excellent collaborative research.

Clusters and cross-sectional topics

In the five clusters, new research impulses are set across institutions and competencies are bundled in transdisciplinary collaboration for cutting-edge research. Two cross-cutting themes connect the research fields through overarching socially relevant issues in the core areas of digital transformation and legitimacy & responsibility. In research and teaching, the clusters work closely with the Centers of Excellence.

Final Course Choice Seminar/ Course Application

- Check the course list regularly for information regarding the application
- Application might be done via an online tool, an Email to the assistant in charge or the LSF. It is mentioned on the LSF course page or on the institute's page and in the [course list](#)
- Registration for the online courses [via moodle](#) or similar will also be indicated in the course page only possible shortly before the semester starts possibly replaced by attendance
