

STATISTICS FOR EES — EXERCISE SHEET 0

---

1. To be done by Thursday, 16. April: Fill in your estimations of the blue areas into the online spread sheet for which the link will be sent on moodle. Put a pseudonym for the first column, the number of the figure into the second and your estimation into the third. Make sure that your pseudonym has not already been used by anybody, but do not look at the estimations of others.

2.

- (a) Make sure that R is installed on the computer you will be using this semester.
- (b) Try out as many as possible of the commands in the R script `R_intro.R` that can be downloaded from [https://cms-cdn.lmu.de/media/19-biologie/fakultaetswebsite-biologie/downloads/evolutionsbiologie/statgen/statees/r\\_intro.r.zip](https://cms-cdn.lmu.de/media/19-biologie/fakultaetswebsite-biologie/downloads/evolutionsbiologie/statgen/statees/r_intro.r.zip). (The file needs to be unzipped after download.)
- (c) Look up commands that you do not understand in the R online documentation.
- (d) For the Thursday session identify questions on the commands in `R_intro.R` for which you could not find the answer in the online documentation.
