

Erasmus+ Calculation of the funding period and the scholarship amount

The minimum duration of the Erasmus+ internship is 60 days according to the Erasmus calculation. The Erasmus calculation is explained below.

Country group	Monthly rate SMP 2022	Daily rate SMP 2022
Group 1 Denmark, Finland, Ireland, Iceland, Liechtenstein, Luxembourg, Norway, Sweden	750 € / Month	750 € / 30 Days 25,00 € / Day
Group 2 Belgium, France, Greece, Italy, Malta, Netherlands, Austria, Portugal, Spain, Cyprus	690 € / Month	690 € / 30 Days 23,00 € / Day
Group 3 Bulgaria, Estonia, Croatia, Latvia, Lithuania, North Macedonia, Poland, Romania, Serbia, Slovakia, Slovenia, Czech Republic, Turkey, Hungary	640 € / Month	640 € / 30 Days 21,33 € / Day

The scholarship rate for the Erasmus mobility is calculated according to country group and length of your stay. If you are on a internship for a whole month (i.e. from the first day of the month to the last day of the month), the whole month is calculated as 30 days. It does not matter whether it is a month with 30 days, such as April, or a month with 31 days, such as July. The daily rate is, therefore, always the monthly rate divided by 30. The only exception is February. If the traineeship ends exactly on 28 (or 29) February, then 28 (or 29) days are credited to the month of February. However, if the traineeship lasts from 1 January to 1 March (or longer), then 30 days are counted for February.

For months that you only partly spend abroad, you calculate the amount of funding using the daily rate. For example: If you start your internship on 16 July, you will receive a daily rate for 15 days in July, as this is also calculated on the basis of 30 days per month.

This also applies to February. For example, if you start your internship on 20 February, 11 days will be counted in February. This means that the only case where 28 (or 29) days are counted in February is when the internship ends exactly on 28 or 29 February.

Since Erasmus+ Traineeship scholarships are only eligible from 60 working days, we provide you with Erasmus calculation examples below. You can use these to calculate your scholarship rate and check if you fulfill the minimum length requirement for your stay.

Calculation examples:

Country of destination (example)	Country group 1: e.g. Ireland	Country group 2: e.g. Spain	Country group 3: e.g. Poland
Traineeship time period/ phase of mobility	1 February – 31 May	19 April – 19 July	5 August – 23 December
Days total	120 days 4 full months (February, March, April, May) 4 months x 30 days = 120 Days	91 days 2 full months (May and June) + 12 days of April + 19 days of July = 3 months x 30 days + 1 day = 91 days	139 days 3 full months (September, October, November) + 26 days of August + 23 days of December = 4 months x 30 days + 19 days = 139 days
Days with scholarship	120 days (= 4 full months)	91 days (= 3,03 months)	139 days (= 4,63 months)
Amount of scholarship in €	4 months x 750 € = 3.000 € <u>Alternatively:</u> 120 days x 25 € = 3.000 €	3 months x 690 € + 23,00 € = 2.093 € <u>Alternatively:</u> 91 days x 23 € = 2.093 €	4 months x 640 € + 19 days x 21,33 € = 2964,87 € <u>Alternatively:</u> 139 days x 21,33 € = 2.964,87 €

Additional funding (Top-Ups):

In addition to the basic Erasmus+ scholarship you can receive Top-Ups.

1. Green Travel Top-up

A single payment of 50 € plus possibly 1 - 4 additional scholarship days, if your journey to your destination and back takes longer by using means of Green Travel as compared to means of non-Green Travel. These amounts will be added to your scholarship total.

More information on Green Travel can be found on the "The Erasmus+ Traineeship Programme" website under "Further Information" and "Green Travel Top-up".

2. Inclusion and Diversity Top-up

This Top-Up includes an additional 250€ monthly.

To find out which student groups are eligible for this top-up, please go back to the website "The Erasmus+ Traineeship Programme". The information can be found under "Further Information" and "Inclusion and Diversity Top-up".
