

LMU Erasmus+ Day Calculator for the calculation of your total working days and scholarship rate

Minimum length of internship: 60 days according to the Erasmus+ Day Calculator

Country group	Monthly rate SMP 2020	Daily rate SMP 2020
Group 1 Denmark, Finland, Ireland, Iceland, Liechtenstein, Luxemburg, Norway, Sweden, United Kingdom	555 € / month	555 € / 30 days 18,50 € / day
Group 2 Belgium, France, Greece, Italy, Malta, The Netherlands, Austria, Portugal, Spain, Cyprus	495 € / month	495 € / 30 days 16,50 € / day
Group 3 Bulgaria, Estonia, Croatia, Latvia, Lithuania, Poland, Romania, Serbia, Slovakia, Slovenia, Republic of Macedonia, Czech Republic, Turkey, Hungary	435 € / month	435 € / 30 days 14,50 € / day

The scholarship rate for the Erasmus mobility is calculated according to country group and length of your stay. If you are on an internship for a whole month (i.e. from the first day of the month to the last day of the month), the whole month is calculated as 30 days. It does not matter whether it is a month with 30 days, such as April, or a month with 31 days, such as July. The daily rate is, therefore, always the monthly rate divided by 30. There is only one exception in February. If the internship ends exactly on 28 (or 29) February, then 28 (or 29) days are credited to the month of February. However, if the internship lasts from 1 January to 1 March, then 30 days are counted for February.

For months that you only partly spend abroad, you calculate the amount of funding using the daily rate. For example: If you start your internship on 16 July, you will receive a daily rate for 15 days in July, as this is also calculated on the basis of 30 days per month.

This also applies to February. For example, if you start your internship on 20 February, 11 days will be counted in February. This means that the only case where 28 (or 29) days are counted in February is when the internship ends exactly on 28 or 29 February.

In order to calculate how many working days you are in the internship, this is also relevant, as Erasmus+ Internships scholarships are only eligible from 60 working days according to the Erasmus calculation examples below. You can use these to be able to do your scholarship calculation yourself.

Calculation examples:

Example country of destination	Country group 1: e.g. Ireland	Country Group 2: e.g. Spain	Country group 3: e.g. Poland
Internship time period/ phase of mobility	01 February– 31 May	19 April – 19 July	05 August – 23 December
Total days	120 days 4 full months (February, March, April, May) 4 months x 30 days = 120 days	91 days 2 full months (May and June) + 12 days in April + 19 days in July) = 3 months x 30 days + 1 day = 91 days	139 days 3 full months (September, October, November) + 26 days in August + 23 days in December = 4 months x 30 days + 19 days = 139 days
Days with scholarship	120 days (= 4 full months)	91 days (= 3,03 months)	139 days (= 4,63 months)
Amount of scholarship in €	4 months x 555 € = 2220 € <i>Or:</i> 120 days x 18,50 € = 2220 €	3 months x 495 € + 16,50 € (1 day) = 1501,50 € <i>Or:</i> 91 days x 16,50 € = 1501,50 €	(4 months x 435 €) + (19 days x 14,50 €) = 2015,50 € <i>Or:</i> 139 days x 14,50 € = 2015,50 €
